

PERFORMANCE MANAGEMENT FRAMEWORK (2027)

Strategy Alignment · Performance Architecture · Role Segmentation · Review & Calibration

PROPOSED DESIGN FOR DISCUSSION

AUGUST 2026

PMS GOVERNANCE — DESIGN RULES

The framework becomes credible only when objective quality, ownership, evidence and calibration are governed consistently.

1

STRATEGY CASCADE

Grade 18+ objectives originate from approved Group / KBU priorities.

2

LINE OF SIGHT

Department and individual KPIs must identify the leadership objective they support.

3

QUALITY OVER VOLUME

Use a limited number of meaningful outcomes; avoid activity checklists.

4

100% WEIGHTING

Weighted forms must total 100%; weights are confirmed during goal setting.

5

CONTROLLED CHANGES

Objectives are not retrospectively changed at year-end; material changes require approval.

6

EVIDENCE

Ratings above expectations require clear evidence and manager justification.

7

NO FORCED CURVE

The ratings should not be mechanically forced into a bell curve.

PMS DESIGN INTENT — ALIGN PERFORMANCE TO THE NORTH STAR

The PMS should translate Group strategy into visible, measurable accountability across leadership, functions and individual roles.

PMS principle: every leadership objective, departmental KPI and individual measure should have a clear line of sight to one or more strategic ambitions.

FROM STRATEGIC AMBITION TO INDIVIDUAL PERFORMANCE

The OKR framework defines what winning looks like; the PMS translates that intent into role-level accountability.

PROPOSED PMS ARCHITECTURE — ONE FRAMEWORK, FIVE FORMS

Two leadership scorecards for Grade 18+ and three differentiated forms for Grade 17 and below.

Design rule: different populations use different forms, but all are governed by one performance cycle, one rating philosophy and one calibration process.

GRADE 18+ — LEADERSHIP SCORECARD SPLIT

Leadership performance remains strategic, but the scorecard reflects the different accountability of Group and operating businesses.

DUG / GROUP LEADERSHIP

Customer

Group stakeholder / client outcomes

Financials

Group financial delivery and stewardship

People & Culture

Leadership, talent and organizational outcomes

Strategic Initiatives

Transformation and enterprise priorities

KBU LEADERSHIP

Business Development

Pipeline, client relationships and bid strategy

Backlog & New Awards

Secured backlog, order intake and award quality

Projects

Delivery, productivity, quality, cash and controls

Financials

Revenue, margin, cash and business performance

Strategic Initiatives

Transformation and enterprise priorities

Common template fields

DUG LEADERSHIP SCORECARD — TEMPLATE

Grade 18+ | Group / DUG leadership | Customer · Financials · People & Culture · Strategic Initiatives

PERSPECTIVE	OBJECTIVE / KEY RESULT	MEASURE / TARGET	WEIGHT	ACTUAL	RATING
Customer					
Financials					
People & Culture					
Strategic Initiatives					
TOTAL			100%		

Weighting principle

Weights are set annually against approved priorities and must total 100%; they should not be hard-coded permanently by perspective.

DUG LEADERSHIP SCORECARD — WEIGHTING SENSITIVITY — FOR APPROVAL

Grade 18+ | Illustrative annual weighting shift across Customer, Financials, People & Culture and Strategic Initiatives

PERSPECTIVE	2026 WEIGHT	2027 WEIGHT	2028 WEIGHT	Δ 2026–28	ILLUSTRATIVE RATIONALE
Customer	10%	15%	20%	+10 pp	Increase client and stakeholder focus
Financials	20%	25%	30%	+10 pp	Strengthen margin, cash and predictability
People & Culture	10%	15%	20%	+10 pp	Build leadership depth and capability
Strategic Initiatives	60%	45%	30%	-30 pp	Taper transformation weighting as initiatives mature
TOTAL	100%	100%	100%	—	Annual total remains 100%

Illustrative scenario

Annual weights must reflect approved priorities, total 100%, and be confirmed during goal setting.

KBU LEADERSHIP SCORECARD — TEMPLATE

Grade 18+ | KBU leadership | Four core perspectives + optional Strategic Initiatives

PERSPECTIVE	OBJECTIVE / KEY RESULT	MEASURE / TARGET	WEIGHT	ACTUAL	RATING
Business Development					
Backlog & New Awards					
Projects					
Financials					
Strategic Initiatives					
TOTAL			100%		

KBU design emphasis

KBU measures should balance forward pipeline, secured awards and backlog, project delivery, and financial performance.

GRADE 17 & BELOW — PERFORMANCE SEGMENTATION

The form should match the nature of work. KPI discipline is retained where outcomes can be measured; support roles are assessed against role standards.

DEPARTMENT HEADS / SENIOR MANAGERS

KPI-BASED

- Functional / departmental outcomes
- Team delivery and management accountability
- Clear linkage to Grade 18+ scorecard
- Recommended 4–6 meaningful KPIs
- Weights total 100%

PROJECT DELIVERY / PROFESSIONAL ROLES

KPI-BASED

- Project milestones and delivery
- Technical / professional output
- Quality, cost, schedule or productivity
- Customer / stakeholder measures where relevant
- Collaboration
- Influence & Stakeholder Management
- Execution & Stakeholder Orientation

ADMINISTRATIVE / SUPPORT ROLES

NON-KPI

- Core job responsibilities
- Quality and accuracy
- Timeliness and reliability
- Service and responsiveness
- Process / compliance
- Collaboration and improvement

Avoid artificial KPIs: activity counts should not be used as performance measures unless they genuinely represent an outcome or service standard.

DEPARTMENT HEADS & SENIOR MANAGERS — KPI TEMPLATE

Grade 17 & below | KPI-based | Functional / departmental accountability with mandatory strategy linkage

#	KPI / OUTCOME	LINKED DUG / KBU OBJECTIVE	MEASURE / TARGET	WEIGHT	ACTUAL	RATING
1						
2						
3						
4						
5						
6						
	TOTAL			100%		

LINE OF SIGHT

Every KPI should identify the Group/KBU objective it supports.

FOCUS

Use 4–6 high-value KPIs — not a long activity checklist.

OWNERSHIP

KPIs agreed at goal setting; material changes require approval.

PROJECT DELIVERY & PROFESSIONAL ROLES — KPI TEMPLATE — SAMPLE

Grade 17 & below | KPI-based | Measures should reflect the actual delivery model of the role.

PERFORMANCE AREA	KPI / OUTCOME	MEASURE / TARGET	WEIGHT	ACTUAL	RATING
Project / Delivery					
Cost / Productivity					
Quality					
Schedule / Milestones					
Customer / Stakeholder					
Technical / Functional					
TOTAL			100%		

Role library examples

Engineering / Project roles: milestone delivery, rework/NCR, productivity, documentation, client deliverables. | Corporate professionals: accuracy, timeliness, forecast quality, process improvement, stakeholder outcomes, Collaboration

ADMINISTRATIVE & SUPPORT ROLES — NON-KPI TEMPLATE

Performance is assessed against clear role standards rather than artificial numerical KPIs.

PERFORMANCE STANDARD	EXPECTED STANDARD	ILLUSTRATIVE WEIGHT	EMPLOYEE COMMENTS	MANAGER RATING
Core Job Responsibilities	Consistently performs responsibilities defined in the JD	40%		
Quality & Accuracy	Work is accurate with minimal errors / rework	15%		
Timeliness & Reliability	Tasks completed within required timelines	15%		
Service & Responsiveness	Timely, professional support to stakeholders	10%		
Process & Compliance	Follows policies, procedures and controls	10%		
Collaboration & Improvement	Works effectively and improves daily work	10%		
TOTAL		100%		

Note: weights shown are illustrative and should be validated against role architecture before system configuration.

USE ONE PMS RATING SCALE ACROSS ALL FORMS

The five-point PMS scale assesses employee performance for year-end calibration.

PMS RATING — ALL FORMS

5	Exceptional	Significantly exceeds agreed outcomes
4	Exceeds Expectations	Consistently exceeds targets
3	Meets Expectations	Delivers agreed expectations
2	Partially Meets	Material gaps remain
1	Does Not Meet	Substantially below expectations

Apply the same five-point PMS scale across all forms.

Final ratings should reflect agreed outcomes, evidence, context and calibration.

PERFORMANCE CYCLE & REVIEW CADENCE

One cadence across all forms, with stronger strategy reviews for leadership and structured review milestones for the wider organization.

EMPLOYEE PMS CADENCE

- Goal setting — start of cycle
- Mid-year — progress only, not forced final rating
- Year-end — assessment, calibration and development

Reference: Depa Group OKR Set 2026/2027 — scoring, escalation and review cadence

DELIVERY TRANSITION

IMPLEMENTATION & NEXT STEPS

Turn the approved PMS framework into configured tools, clear ownership and a controlled 2027 rollout.

2027

PMS CYCLE

FROM DESIGN
TO DELIVERY

IMPLEMENTATION ROADMAP — KPI CASCADE, TRAINING & NEXUS

GCEO sets KPIs for N-1; KBU Heads cascade to N-2/N-3 and below; training begins in September; Nexus rollout depends on IT readiness.

01 SET N-1 KPIs

02 CASCADE TO N-2 / N-3

03 TRAIN LEADERS & MANAGERS

04 CONFIGURE NEXUS

INDICATIVE TIMING | AUGUST 2026 → 2027 CYCLE

01 AUGUST 2026

OWNER | GCEO

SET N-1

Approve Group priorities, measures and weightings.
Assign agreed KPIs to each N-1 leader.

02 AUG–SEP 2026

OWNER | KBU HEADS

CASCADE TO N-2 / N-3

Translate Group KPIs into KBU scorecards.
Cascade objectives to N-2, N-3 and lower levels.

03 STARTS SEPT& October 2026

OWNER | L&D + LEADERSHIP

TRAIN ALL MANAGERS

Train the leadership team and all managers on SMART objectives, evidence, scoring and check-ins.

04 Q4 2026 | IT DEPENDENT

OWNER | IT

CONFIGURE NEXUS

Build the hierarchy and mandatory Group / KBU objective links; pilot and release for the 2027 cycle.

CRITICAL PATH

GCEO approval → KBU cascade → September and October r training → Nexus configuration, testing and release. IT must confirm resourcing,.

THANK YOU
